CONTENTS

Tectonophysics Volume 165

Research Papers

Unmixing mid-ocean ridge basalts with EXTENDED QMODEL
Horkowitz, J., Stakes, D. and Ehrlich, R. (Columbia, S.C., U.S.A.) 1

Magnetic fabric and orientation tensor of minerals in rocks
Henry, B. (Saint-Maur, France) 21

Reorientation of remanent magnetism during tectonic fabric development: an example from the Waynesboro Formation, Pennsylvania, U.S.A.
Vetter Jr., J.R., Kodama, K.P. (Bethlehem, Pa., U.S.A.) and Goldstein, A. (Hamilton, N.Y., U.S.A.) 29

The building of the Central Swiss Alps: an experimental approach
Merle, O. and Guillier, B. (Rennes, France) 41

Strain models within spreading nappes
Merle, O. (Rennes, France) 57

Paleomagnetism of Upper Carboniferous limestones from the Carnic Alps
Manzoni, M., Venturini, C. and Vigliotti, L. (Bologna, Italy) 73

Finite element modelling of a continental rift structure (Rhinegraben) with a large-deformations algorithm
Ricke, M. and Mechie, J. (Karlsruhe, F.R.G.) 81

Modelling of structures representing the South Armorican suture
De Poulpiquet, J. and Lefort, J.P. (Rennes, France) 93

Gravity constraints on the deep structure of the Pyrenean belt along the ECORS profile
Torné, M. (Barcelona, Spain), De Cabissole, B., Bayer, R. (Montpellier, France), Casas, A. (Barcelona, Spain), Daignières, M. (Montpellier, France) and Rivero, A. (Madrid, Spain) 105

Opposite vergence of a kink fold and pressure solution cleavage, southeast Spain: a study of the relation between paleostress and fold kinematics
Stel, H. and De Ruig, M.J. (Amsterdam, The Netherlands) 117

The Togo–Benin–Nigeria Shield: evidence of crustal aggregation in the Pan-African belt
Ajibade, A.C. (Minna, Nigeria) and Wright, J.B. (Milton Keynes, England) 125

Palaeomagnetism of the upper zone of the Bushveld Complex
Hattingh, P.J. (Pretoria, South Africa) 131

Large-scale tensional features along the Dead Sea–Jordan Rift Valley
Arkin, Y. (Jerusalem, Israel) 143

Inversion of regional gravity anomalies and main features of the deep crustal geology of India
Negi, J.G., Agrawal, P.K. and Thakur, N.K. (Hyderabad, India) 155

Metamorphism and crustal stacking in the North Indian Plate, North Pakistan
Treloar, P.J., Williams, M.P. and Coward, M.P. (London, U.K.) 167

Reconstruction of principal stress axes by fault striations, the case of the western South Fossa Magna, Japan
Fukuchi, T. (Ibaraki, Japan) 185

The synchronism of crustal thickening and low-pressure facies metamorphism in the Mount Isa Inlier, Australia. 2. Fast convective thinning of mantle lithosphere during crustal thickening
Loosveld, J.H. (Canberra, A.C.T., Australia) 191

Origin of the oceanic basalt basement of the Solomon Island arc and its relationship to the Ontong Java Plateau—insights from Cenozoic plate motion models
Wells, R.E. (Menlo Park, Calif., U.S.A.) 219

Seismotectonics and present-day relative plate motions in the Tonga–Lau and Kermadec–Havre region
Pelletier, B. and Louat, R. (Nouméa, New Caledonia) 237

Geodynamics of an arc–ridge junction: the case of the New Hebrides Arc/North Fiji Basin
Maillet, P. (Plouzané, France), Monzier, M. (Nouméa, New Caledonia), Eissen, J.-Ph. (Plouzané, France) and Louat, R. (Nouméa, New Caledonia) 251

Special section on Fine Structure and Anisotropy of the Lithosphere (convened by G.G.R. Buchbinder, J. Ansorge and S. Crampin)

Preface 270

An automated, analytical method to determine shear-wave splitting
Shih, X.R., Meyer, R.P. (Madison, Wisc., U.S.A.) and Schneider, J.F. (Washington, D.C., U.S.A.) 271

Shear-wave anisotropy of active tectonic regions via automated S-wave polarization analysis
Savage, M.K., Shih, X.R., Meyer, R.P. and Aster, R.C. (Madison, Wisc., U.S.A.) 279

Azimuthal variations in P-wave travel times and shear-wave splitting in the Charlevoix seismic zone
Buchbinder, G.G.R. (Ottawa, Ont., Canada) 293
An anomalously thick layering of the crust of the Yamato Basin, southeastern Sea of Japan: the final stage of back-arc spreading
Hirata, N., Tokuyama, H. and Chung, Y. (Tokyo, Japan) 303
A detailed subduction structure in the Kuril trench deduced from ocean bottom seismographic refraction studies
Iwasaki, T., Shiobara, H. (Sapporo, Japan), Nishizawa, A. (Sendai, Japan), Kanazawa, T., Suyehiro, K., Hirata, N., Urabe, T. (Tokyo, Japan) and Shimamura, H. (Sapporo, Japan) 315
